## NEW YORK STATE COLLEGE OF AGRICULTURE ANNOUNCEMENT OF THE SUMMER TERM 1917

APRIL 1, 1917  
PUBLISHED BY CORNELL UNIVERSITY  
ITHACA, NEW YORK

## CALENDAR

### Summer Term, 1917

June 15-16,	Friday-Saturday,	Registration of all students.
June 18,	Monday,	Instruction begins in all courses.
June 27,	Wednesday,	Forty-ninth Annual Commencement. Half holiday.
July 4,	Wednesday,	Holiday.
Sept. 26,	Wednesday,	Instruction ends.

### Summer Session

July 9,	Monday,	Summer Session begins.
Aug. 17,	Friday,	Summer Session ends.

### Fall Term, 1917-18

Sept. 14,	Friday,	Entrance examinations begin.
Sept. 24-25,	Monday-Tuesday,	Registration of new students.
Sept. 26,	Wednesday,	Registration of old students.
Sept. 27,	Thursday,	Instruction begins.
Sept. 29,	Saturday,	Registration, Graduate School.

# NEW YORK STATE COLLEGE OF AGRICULTURE

## FACULTY

Jacob Gould Schurman, A.M., D.Sc., LL.D., President of the University.  
Albert Russell Mann, B.S.A., A.M., Acting Dean of the College of Agriculture and Acting Director of the Experiment Station.  
Isaac Phillips Roberts, M.Agr., Professor of Agriculture, Emeritus.  
John Henry Comstock, B.S., Professor of Entomology and General Invertebrate Zoology, Emeritus.  
Henry Hiram Wing, M.S. in Agr., Professor of Animal Husbandry.  
Thomas Lyttleton Lyon, Ph.D., Professor of Soil Technology.  
John Lemuel Stone, B.Agr., Professor of Farm Practice.  
James Edward Rice, B.S.A., Professor of Poultry Husbandry.  
George Walter Cavanaugh, B.S., Professor of Chemistry in its Relations to Agriculture.  
George Nieman Lauman, B.S.A., Professor of Rural Economy.  
Herbert Hice Whetzel, M.A., Professor of Plant Pathology.  
Elmer O. Fippin, B.S.A., Extension Professor of Soil Technology.  
George Frederick Warren, Ph.D., Professor of Farm Management.  
William Alonzo Stocking, jr., M.S.A., Professor of Dairy Industry.  
Charles Henry Tuck, A.B., Professor of Extension Teaching.  
Wilford Murry Wilson, M.D., Professor of Meteorology.  
Ralph Sheldon Hosmer, B.A.S., M.F., Professor of Forestry.  
James George Needham, Ph.D., Professor of Entomology and Limnology.  
Rollins Adams Emerson, D.Sc., Professor of Plant Breeding.  
Harry Houser Love, Ph.D., Professor of Plant Breeding Investigations.  
Donald Reddick, Ph.D., Professor of Plant Pathology.  
Edward Gerrard Montgomery, M.A., Professor of Farm Crops.  
George Alan Works, B.Ph., M.S. in Agr., Professor of Rural Education.  
Flora Rose, B.S., M.A., Professor of Home Economics.  
Martha Van Rensselaer, A.B., Professor of Home Economics.  
William Albert Riley, Ph.D., Professor of Insect Morphology and Parasitology.  
James Adrian Bizzell, Ph.D., Professor of Soil Technology.  
Glenn Washington Herrick, B.S.A., Professor of Economic Entomology and Entomologist of the Experiment Station.  
Howard Wait Riley, M.E., Professor of Rural Engineering.  
Harold Ellis Ross, M.S.A., Professor of Dairy Industry.  
Hugh Charles Troy, B.S.A., Professor of Dairy Industry.  
Samuel Newton Spring, B.A., M.F., Professor of Forestry.  
Karl McKay Wiegand, B.S., Ph.D., Professor of Botany.  
William Henry Chandler, M.S. in Agr., Ph.D., Professor of Pomology.  
Arthur Bernhard Recknagel, B.A., M.F., Professor of Forestry.  
Merritt Wesley Harper, M.S., Professor of Animal Husbandry.  
Cyrus Richard Crosby, A.B., Extension Professor of Entomology.  
Elmer Seth Savage, M.S.A., Ph.D., Professor of Animal Husbandry.  
Kenneth Carter Livermore, M.S. in Agr., Professor of Farm Management.  
Edward Albert White, B.Sc., Professor of Floriculture.  
Alvin Casey Beal, Ph.D., Professor of Floriculture.  
Herbert Andrew Hopper, B.S.A., M.S., Extension Professor of Animal Husbandry.  
Edward Sewall Guthrie, M.S. in Agr., Ph.D., Professor of Dairy Industry.  
Maurice Chase Burritt, M.S. in Agr., Extension Professor, and State Director of Farm Bureaus.  
William Charles Baker, B.S.A., Professor of Drawing.  
Mortier Franklin Barrus, Ph.D., Extension Professor of Plant Pathology.  
Lewis Josephus Cross, B.A., Ph.D., Professor of Chemistry in its Relations to Agriculture.  
Oskar Augustus Johannsen, A.M., Ph.D., Professor of General Biology.

Clyde Hadley Myers, Ph.D., Professor of Plant Breeding.  
 Bristow Adams, B.A., Professor, Editor of Publications.  
 Dick J. Crosby, M.S., Professor of Extension Teaching.  
 Asa Carlton King, B.S.A., Professor of Farm Practice.  
 Cornelius Betten, Ph.D., Professor, Secretary, and Registrar.  
 George Abram Everett, A.B., LL.B., Professor of Extension Teaching.  
 Frederick Llewellyn Griffin, B.S., M.S., Professor of Rural Education.  
 Lewis Knudson, B.S.A., Ph.D., Professor of Botany.  
 E. Gorton Davis, B.S., Professor of Landscape Art.  
 Ralph Wright Curtis, M.S.A., Professor of Landscape Art.  
 Claude Burton Hutchison, M.S. in Agr., Professor of Plant Breeding.  
 Ralph Waldo Rees, B.S., Professor of Pomology.  
 James Chester Bradley, Ph.D.; Assistant Professor of Systematic Entomology.  
 John Bentley, jr., B.S., M.F., Assistant Professor of Forestry.  
 George Charles Embury, Ph.D., Assistant Professor of Aquiculture.  
 Harry Oliver Buckman, M.S.A., Ph.D., Assistant Professor of Soil Technology.  
 Mrs. Helen Binkerd Young, B.Arch., Assistant Professor of Home Economics.  
 Mrs. Anna Botsford Comstock, B.S., Assistant Professor of Nature Study.  
 Ralph Hicks Wheeler, B.S., Assistant Professor of Extension Teaching.  
 Harry Morton Fitzpatrick, Ph.D., Assistant Professor of Plant Pathology.  
 Byron Burnett Robb, B.S. in Agr., M.S. in Agr., Assistant Professor of Rural Engineering.  
 Walter Warner Fisk, M.S. in Agr., Assistant Professor of Dairy Industry.  
 Vern Bonham Stewart, Ph.D., Assistant Professor of Plant Pathology.  
 Annette J. Warner, Assistant Professor of Home Economics.  
 Arthur Lee Thompson, Ph.D., Assistant Professor of Farm Management.  
 Royal Gilkey, B.S.A., Assistant Professor of Extension Teaching, and Supervisor of Reading Course for the Farm.  
 Charles Truman Gregory, Ph.D., Assistant Professor of Plant Pathology.  
 Lex Ray Hesler, Ph.D., Assistant Professor of Plant Pathology.  
 William Howard Rankin, Ph.D., Assistant Professor of Plant Pathology.  
 Earl Whitney Benjamin, B.S. in Agr., M.S. in Agr., Ph.D., Assistant Professor of Poultry Husbandry.  
 Arthur Johnson Eames, A.B., A.M., Ph.D., Assistant Professor of Botany.  
 James Kenneth Wilson, B.S., Ph.D., Assistant Professor of Soil Technology.  
 Elmer Eugene Barker, Ph.D., Assistant Professor of Plant Breeding.  
 Edward Mowbray Tuttle, B.S. in Agr., A.B., Assistant Professor of Rural Education.  
 Robert Matheson, M.S. in Agr., Ph.D., Assistant Professor of Economic Entomology and Assistant Entomologist of the Experiment Station.  
 Blanche Evans Hazard, A.B., M.A., Assistant Professor of Home Economics.  
 David Lumsden, Assistant Professor of Floriculture.  
 John Hall Barron, B.S.A., Assistant Extension Professor of Farm Crops.  
 Gad Parker Scoville, B.S. in Agr., Assistant Professor of Farm Management.  
 Arthur Augustus Allen, Ph.D., Assistant Professor of Ornithology.  
 Leonard Amby Maynard, A.B., Ph.D., Assistant Professor of Animal Husbandry.  
 Forest Milo Blodgett, Ph.D., Assistant Professor of Plant Pathology.  
 Miriam Birdseye, B.A., Assistant Professor of Home Economics.  
 Jacob Richard Schramm, A.B., Ph.D., Assistant Professor of Botany.  
 Howard Edward Babcock, Ph.B., Assistant Professor, and Assistant State Director of Farm Bureaus.  
 Edward Riley King, B.S., Assistant Professor of Entomology.  
 Frank Elmore Rice, A.B., Ph.D., Assistant Professor of Agricultural Chemistry.  
 Lester Whyland Sharp, B.S., Ph.D., Assistant Professor of Botany.  
 John Clarence McCurdy, B.S., C.E., Assistant Professor of Rural Engineering.  
 Clarence A. Boutelle, Assistant Extension Professor of Animal Husbandry.  
 Charles Howard Royce, M.S.A., Assistant Extension Professor of Animal Husbandry.  
 George Harris Collingwood, B.S., Assistant Professor of Forestry.  
 Montgomery Robinson, Litt.B., B.S., Assistant Professor of Extension Teaching.

Wesley Worth Warsaw, B.S. in A.E., Assistant Professor of Soil Technology.  
Paul Work, A.B., M.S. in Agr., Superintendent of the Department and Instructor in Vegetable Gardening.  
Layton S. Hawkins, B.A., Specialist in Agricultural Education, Lecturer in Rural Education.  
George Walter Tailby, jr., B.S.A., Instructor, and Superintendent of Livestock.  
Bertha E. Titsworth, B.S., Instructor in Home Economics.  
Cecil Calvert Thomas, A.B., M.A., Instructor in Botany.  
Earle Volcart Hardenburg, B.S., M.S. in Agr., Instructor in Farm Crops.  
Richard Alan Mordoff, B.S. in Agr., Assistant Registrar.  
Otis Freeman Curtis, A.B., Instructor in Botany.  
Oliver Wesley Dynes, M.S. in Agr., Instructor in Farm Crops.  
Albert Edmund Wilkinson, B.S., M.S., Extension Instructor in Vegetable Gardening.  
Thomas Joseph McInerney, M.S. in Agr., Instructor in Dairy Industry.  
Eugene Davis Montillon, B.Arch., Instructor in Landscape Art.  
Juan Estevan Reyna, E.E., Instructor in Drawing.  
Leslie Eugene Hazen, B.S. in Agr., M.E., Instructor in Farm Mechanics.  
James Lewis Strahan, B.S. in Agr., M.S. in Agr., Instructor in Farm Structures.  
Earl Long Overholser, M.A., Instructor in Pomology.  
Cass Ward Whitney, B.S., Instructor in Extension Teaching.  
Royal Josylin Haskell, B.S., Instructor in Plant Pathology.  
Charles Paul Alexander, B.S., Instructor in Natural History.  
Laurence Howland MacDaniels, A.B., Instructor in Botany.  
Allan Cameron Fraser, B.S., Instructor in Plant Breeding.  
Lula Alice Minns, B.S., Instructor in Floriculture.  
George Cornell Supplee, M.S.A., Instructor in Dairy Industry.  
Anna Elizabeth Hunn, B.S., Instructor in Home Economics, and Manager of the Cafeteria.  
William Thomas Craig, Instructor in Plant Breeding.  
Arthur John Heinicke, B.S.A., M.A., Ph.D., Instructor in Pomology.  
Olney Brown Kent, B.S., Instructor in Poultry Husbandry.  
Harold Deane Phillips, A.B., B.S. in Agr., Instructor in Rural Economy.  
Henry William Schneck, B.S., M.S.A., Instructor in Vegetable Gardening.  
Karl John Seulke, M.S.A., Ph.D., Instructor in Animal Husbandry.  
DeVoe Meade, B.S., Instructor in Animal Husbandry.  
Edward Gardner Misner, B.S., Instructor in Farm Management.  
Arthur Merle Besemer, B.S., Instructor in Dairy Industry.  
Archie Byron Dann, B.S., Instructor in Poultry Husbandry.  
Edwin Sleight Ham, B.S., Instructor in Animal Husbandry.  
Thomas Alexander Baker, B.S., Instructor in Animal Husbandry.  
Louis Melville Massey, Ph.D., Instructor in Plant Pathology.  
Leon Augustus Hausman, B.A., Instructor in Meteorology.  
Ellis Lore Kirkpatrick, B.S.A., Instructor in Vegetable Gardening.  
Winfred Enos Ayres, Extension Instructor in Dairy Industry.  
Albert Scott Kenerson, B.S., Instructor in Vegetable Gardening.  
Howard Bowman Ellenberger, B.S.A., Instructor in Dairy Industry.  
Clark Leonard Thayer, B.Sc., Instructor in Floriculture.  
Ralph Sylvanus Moseley, Extension Instructor in Poultry Husbandry.  
Lewis Merwin Hurd, Extension Instructor in Poultry Husbandry.  
William Irving Myers, B.S., Instructor in Farm Management.  
Lew Ellsworth Harvey, B.S., Instructor in Farm Management.  
Cedric Hay Guise, B.S., M.F., Instructor in Forestry.  
Emil Volz, B.Sc., Instructor in Floriculture.  
Gilbert Warren Peck, B.S., Extension Instructor in Pomology.  
Frances E. Vinton, B.A., Instructor in Home Economics.  
Albert Reiff Bechtel, B.S., A.M., Instructor in Botany.  
James Marshall Brannon, B.A., M.A., Instructor in Botany.  
Frank Burkett Wann, A.B., Instructor in Botany.

Wallace Larkin Chandler, B.S., M.S., Instructor in Parasitology.  
 Mary Frances Henry, A.B., Instructor in Home Economics.  
 Clara Louise Garrett, B.S., Instructor in Drawing.  
 Clarence Vernon Noble, B.S., Instructor in Farm Management.  
 Sarah Lucile Brewer, B.S., Instructor in Home Economics.  
 Charles Parsons Clark, B.S., Instructor in Farm Management.  
 Anson Wright Gibson, Instructor in Farm Practice.  
 Anna Jane Hancy, A.B., M.A., Instructor in Botany.  
 Edwin Fraser Hopkins, B.S., Instructor in Plant Pathology.  
 Louis Arthur Zimm, B.S., Instructor in Plant Pathology.  
 Fleming Bates Sherwood, B.S., M.S., Instructor in Soil Technology.  
 Frederick Gardner Behrends, B.S., Instructor in Farm Mechanics.  
 Walter Gernet Krum, Instructor in Poultry Husbandry.  
 Ralph Waldo Emerson Cowan, B.S., Instructor in Dairy Industry.  
 Julia Gleason, Instructor in Home Economics.  
 D. Margaret Holmes, B.S., Instructor in Home Economics.  
 Harry Hazelton Knight, Ph.B., B.S., Instructor in Entomology.  
 Ada Eljiva Georgia, Assistant in Natural History.  
 Walter Norton Hess, A.B., Assistant in Insect Morphology.  
 Ralph Irving Scoville, M.S. in Agr., Assistant in Dairy Industry.  
 Claribel Nye, B.S., Assistant in Home Economics.  
 Emmons William Leland, B.S.A., Superintendent of Field Experiments in Soil Technology.  
 David Stout Jennings, B.S., Assistant in Soil Technology.  
 Mortimer Demarest Leonard, B.S., Extension Assistant in Entomology.  
 Arthur Bishop Beaumont, B.S., Assistant in Soil Technology.  
 Ward Benjamin White, A.B., Assistant in Dairy Industry.  
 Stuart Ward Frost, B.S., Assistant in Entomology.  
 Eugene Peyton Deatrick, A.B., Assistant in Soil Technology.  
 Roger Cletus Smith, A.B., M.A., Assistant in Biology.  
 Walton I. Fisher, Assistant in Plant Breeding.  
 Charles Edward Hunn, Assistant in Plant Propagation.  
 Franklin Post Metcalf, A.B., Assistant in Botany.  
 Mary Ellen Hill, B.S., Assistant in Biology.  
 William Colcord Woods, A.B., Assistant in Entomology.  
 Winifred Moses, B.S., Assistant in Home Economics.  
 Beulah Blackmore, Assistant in Home Economics.  
 Richard Nugent Lobdell, M.S., Assistant in Biology.  
 Helen Canon, B.A., B.S., Assistant in Home Economics.  
 Lawrance Erickson, A.B., Assistant in Botany.  
 George Raymond Gage, B.S., M.S., Assistant in Botany.  
 Harry E. Knowlton, B.S., Assistant in Botany.  
 Howard Campbell Jackson, B.S., Assistant in Dairy Industry.  
 George Robinson Phipps, B.S., Assistant in Extension Teaching.  
 Benjamin Dunbar Wilson, M.S., Assistant in Soil Technology.  
 Max Flavel Abell, B.S., Assistant in Farm Crops.  
 Ernest Gustaf Anderson, B.Sc., Assistant in Plant Breeding.  
 Ernest Walter Lindstrom, A.B., Assistant in Plant Breeding.  
 Gustave Frederick Heuser, B.S., Assistant in Poultry Husbandry.  
 Wallace Shipman Young, B.S., Assistant in Poultry Husbandry.  
 Clarence Hamilton Kennedy, A.B., M.A., Assistant in Biology.  
 Charles Loring Allen, B.A., Assistant in Animal Husbandry.  
 Thomas Bregger, B.S., Assistant in Plant Breeding.  
 Doak Bain Carrick, A.B., Assistant in Pomology.  
 John Phineus Benson, B.S., Assistant in Botany.  
 Philip Alexander Munz, A.B., A.M., Assistant in Botany.  
 Walter Conrad Muenscher, A.B., M.A., Assistant in Botany.  
 Chester Columbus Demaree, A.B., Assistant in Botany.  
 Edwina Maria Smiley, A.B., Assistant in Plant Pathology.  
 John Hallock Bromley, B.S., Assistant in Soil Technology.

Lawrence Glenn Brown, B.S., Assistant in Entomology.  
Edward Henry Dusham, A.B., M.S., Assistant in Biology.  
Clyde C. Hamilton, B.S., M.S., Assistant in Natural History.  
Ray Allen, A.B., A.M., Assistant in Ornithology.  
Ralph Hubbard, Assistant in Natural History.  
George Hirst Bradley, B.S., Assistant in Natural History.  
Mrs. Edith Fleming Bradford, B.S., Assistant in Home Economics.  
William J. Baerg, A.B., Assistant in Biology.  
Vernon R. Haber, B.S., M.A., Assistant in Entomology.  
George Stewart, B.S., Assistant in Farm Crops.  
Leon Emory Cook, A.B., B.S. in Agr., Assistant in Rural Education.  
Ralph Simpson Nanz, B.S., Assistant in Botany.  
Elizabeth Dean, A.B., Assistant in Botany.  
Victor Ferdinand Tapke, B.S., Assistant in Plant Pathology.  
Edwin Earl Honey, B.S., Assistant in Plant Pathology.  
Edgar Allan Hodson, B.S., M.S., Assistant in Farm Crops.  
Justin Richardson Hartzog, B.S., Assistant in Landscape Art.  
Kenneth Arthur Tapscott, B.S., Assistant in Landscape Art.  
Ralph Esty Griswold, B.S., Assistant in Landscape Art.  
Herbert Percival Buchan, Assistant in Poultry Husbandry.  
Floyd Edward Andrews, Assistant in Poultry Husbandry.  
Kenneth Clark Fox, Assistant in Poultry Husbandry.  
Walter Sprague Frost, B.S., Assistant in Agricultural Chemistry.  
Donald Kiteley Tressler, A.B., Assistant in Agricultural Chemistry.  
Harry Earl Bremer, B.S., Assistant in Dairy Industry.  
Sara Buchanan Huff, Assistant in Home Economics.  
Adele Koch, B.S., Assistant in Home Economics.  
Ernest Dorsey, B.S., Assistant in Plant Breeding.

# **THE NEW YORK STATE COLLEGE OF AGRICULTURE**

## **SUMMER TERM**

The college year in Cornell University is divided into two terms, or semesters, extending from the last of September to the early part of June. In the College of Agriculture there is, in addition, a third, or summer, term, coordinate with the present fall and spring terms.

The primary purpose of the summer term is to take advantage of the growing season in teaching certain subjects to students regularly registered in either graduate or undergraduate courses. The facilities of the College are available for graduate study throughout the summer. In addition, opportunity is provided for advanced students, teachers, and others, who are otherwise engaged during the regular school year, to have the advantage of a long period of special instruction. Particular attention is given to the needs of assistants and instructors in colleges of agriculture who desire to spend their summers in advanced study.

Registration for the summer term will take place on June 15, 9 a. m. to 4 p. m., and on June 16, 9 a. m. to 1 p. m. All students are expected to register first at the office of the University Registrar in Morrill Hall. They will then present themselves at the office of the Secretary of the College of Agriculture in Roberts Hall for further registration and arrangement of schedules. Instruction will begin at 8 a. m. on June 18. The summer term will close at 5 p. m. on September 26. No classes will be held on the forenoon of Commencement Day, June 27, or on July 4.

The requirements for admission to the summer term are stated on page 12.

## **THE COLLEGE OF AGRICULTURE**

Cornell University is composed of eight colleges and the Graduate School. One of these colleges is the College of Agriculture.

Cornell University was chartered by the Legislature in 1865, being founded on the Land Grant Act of 1862. By the terms of the Land Grant Act, teaching in agriculture has been from the first a regular part of the University enterprise. In other states the state government has made appropriations to supplement the work in agriculture. In 1904 the Legislature of the State of New York made an appropriation of \$250,000 for the erection of buildings for the College of Agriculture at Cornell University, and established the College as a state institution under the title "The New York State College of Agriculture at Cornell University." Before this time the State had established at Cornell University "The New York State Veterinary College." In 1906 the Legislature passed an Administration Act defining the purpose and activities of the College of Agriculture thus: "The object of the said college of agriculture shall be to improve the agricultural methods of the state; to develop the agricultural resources of the state in the production of crops of all kinds, in the rearing and breeding of livestock, in the manufacture of dairy and other products, in determining better methods of handling and marketing such products, and in other ways; and to increase intelligence and elevate the standards of living in the rural districts. For the attainment of these objects the college is authorized to give instruction in the

sciences, arts, and practices relating thereto, in such cases and in such manner as shall best serve the interests of the state; to conduct extension work in disseminating agricultural knowledge throughout the state by means of experiments and demonstrations on farms and gardens, investigations of the economic and social status of agriculture, lectures, publications of bulletins and reports, and in such other ways as may be deemed advisable in the furtherance of the aforesaid objects; to make researches in the physical, chemical, biological, and other problems of agriculture, the application of such investigations to the agriculture of New York, and the publication of the results thereof."

### THE BUILDINGS AND FARMS

**The buildings.** The buildings erected under the enactment of 1904 were first occupied in June, 1907. The central group then erected consisted of a main administration and classroom building, an agronomy building, and a dairy building, the three being connected by covered loggias. Subsequently the Legislature provided for the erection of two large barns, a greenhouse, a home economics building, a forestry building, a poultry husbandry building, a soils building, an auditorium, and a classroom building and stock judging pavilion for animal husbandry.

Other buildings included in the present equipment are a frame building that temporarily houses the Department of Rural Engineering, an insectary, a biological station in the marsh at the south end of Cayuga Lake, a fish breeding house in Cascadilla Creek, a seed storage house, and other small buildings on the farms.

**The farms.** The College of Agriculture has 909 acres of land, and it rents 195 acres additional, making a total of 1104 acres under college management. These farms are run not for commercial but for educational purposes, and the practices are therefore modified to meet the varied demands of the institution.

Land in the vicinity of the College is very broken, abounding in hills and dales, brooks and gorges. In consequence, less than one-half of the total area is now available for tillage. Of the 1104 acres, 567 are classified as arable, 304 as pasture, and 143 as wood and waste; 51 are devoted to college grounds, buildings, and old orchards, and 39 are retained for other uses.

Of the tillable area, 45 acres have been laid out in permanent experiment plots for the use of the Departments of Soil Technology and Plant Breeding; 50 acres have been assigned to the Department of Pomology and are largely planted to young trees; 45 acres have been assigned to the Departments of Floriculture and Vegetable Gardening; 73 acres to the Department of Poultry Husbandry; 15 acres to farm-crop gardens and experiments; and there are left to the Department of Farm Practice 339 acres on which to conduct the regular farm operations.

The soil of the college farms is heavy, nearly all of it being Dunkirk clay loam. A few fields at the extreme southeastern corner are Volusia stony loam. The Dunkirk clay loam is entirely unsuited to potatoes and is not well adapted to corn, but will grow fair crops of corn if heavily manured. It is well adapted to wheat, oats, timothy, and clover. The Volusia stony loam when well drained and freed from stones is well adapted to corn and potatoes. The recently acquired areas lack both these improvements.

EXPENSES

Tuition in the College of Agriculture is free to graduate students and to undergraduate students who for a year or more immediately preceding matriculation have been residents of the State of New York. The annual tuition fee for students from outside the State is \$150 for two terms. The tuition fee for the summer term is \$62.50 (after 1917, \$75).

Other fees, required of all students, are as follows:

Matriculation fee . . . . .	\$ 5.00
Fee for baccalaureate degree . . . . .	10.00

Deposit fees are required in various laboratory courses; inquiry concerning these should be made before registration. Students are liable to a special charge for breakage or damage resulting from their own carelessness. Attention is called to the expenses of excursions required in various courses.

The expense of textbooks, instruments, and other necessary articles varies from \$10 to \$75 a year.

There are many private boarding and rooming houses near the University campus. In these the cost of board and furnished room, with heat and light, varies from \$5 to \$12 a week. By the formation of clubs, students are sometimes able to reduce their expenses for room and board.

GENERAL INFORMATION CONCERNING COURSES

The regular instruction in the College of Agriculture constitutes a course of four years, or eight terms, leading to the degree of Bachelor of Science. There is a combined course with the State Veterinary College leading to two baccalaureate degrees. Summer courses in agriculture, designed especially for teachers, school principals and superintendents, and advanced college students, are offered in the six-weeks Summer Session of the University. Aside from these there are winter courses without University credit, and opportunities for students to pursue special work. Circulars describing the winter courses and the short summer courses may be obtained on application to the Secretary.

Students may pursue agricultural subjects in the Graduate School of the University. For full information concerning graduate work and degrees, see the Announcement of the Graduate School.

THE REGULAR FOUR YEAR COURSE

Men who are candidates for admission to the regular, or four year, course must be at least sixteen years of age; women must be at least seventeen years of age. They must have certificates of good moral character, and students from other colleges or universities are required to furnish from those institutions certificates of honorable dismissal. Students are admitted on examination, or on presenting credentials of the Education Department of the State of New York, or on acceptable school certificates.

*Prospective students who have neither lived on farms nor had considerable practical experience in agriculture are urged to spend at least one year on a well-managed farm in order to familiarize themselves with common farm affairs and operations before entering the College. This experience is imperative in order to satisfy the farm-practice requirement.*

Candidates for admission must file their credentials and obtain permits for examination at the University Registrar's office, Morrill 10. The results of examination may be ascertained from the Registrar.

### ENTRANCE REQUIREMENTS FOR THE FOUR YEAR COURSE

The subjects that may be offered for admission are named in the following list; the figure in parenthesis following each subject indicates its value in units and shows the maximum and the minimum amount of credit allowed in the subject. A unit represents five recitations a week for one year in a study.

1a. English No. 1 . . . . .	(1 ½)	8c. American History, Civics .	(½-1)
1b. English No. 2 . . . . .	(1 ½)	8d. English History . . . . .	(½-1)
2a. First Year Greek . . . . .	(1)	9a. Elementary Algebra . . . . .	(1)
2b. Second Year Greek . . . . .	(1)	9b. Intermediate Algebra . . . . .	(½)
2c. Third Year Greek . . . . .	(1)	9c. Advanced Algebra . . . . .	(½)
3a. First Year Latin . . . . .	(1)	9d. Plane Geometry . . . . .	(1)
3b. Second Year Latin . . . . .	(1)	9e. Solid Geometry . . . . .	(½)
3c. Third Year Latin . . . . .	(1)	9f. Plane Trigonometry . . . . .	(½)
3d. Fourth Year Latin . . . . .	(1)	9g. Spherical Trigonometry . .	(½)
4a. First Year German . . . . .	(1)	10. Physics . . . . .	(1)
4b. Second Year German . . . . .	(1)	11. Chemistry . . . . .	(1)
4c. Third Year German . . . . .	(1)	12. Physical Geography . . . . .	(½-1)
5a. First Year French . . . . .	(1)	13. Biology* . . . . .	(1)
5b. Second Year French . . . . .	(1)	14. Botany* . . . . .	(½-1)
5c. Third Year French . . . . .	(1)	14a. Zoology* . . . . .	(½-1)
6a. First Year Spanish . . . . .	(1)	15. Bookkeeping** . . . . .	(½-1)
6b. Second Year Spanish . . . . .	(1)	16. Agriculture (including home	
6c. Third Year Spanish . . . . .	(1)	economics)** . . . . .	(½-4)
7a. First Year Italian . . . . .	(1)	17. Drawing . . . . .	(½-1)
7b. Second Year Italian . . . . .	(1)	18. Manual Training . . . . .	(1)
7c. Third Year Italian . . . . .	(1)	19. Any high school subject or	
8a. Ancient History . . . . .	(½-1)	subjects not already used	(½-1)
8b. Modern and Medieval His-			
tory . . . . .	(½-1)		

For admission to the New York State College of Agriculture, an applicant must offer either A or B as below:

A. Fifteen units arranged as follows: English (3), history (1), elementary algebra A (1), plane geometry (1), a foreign language† (3), elective (6). Solid geometry and plane trigonometry are recommended among the elective units for students entering the courses of forestry or landscape art.

B. The Arts College Entrance Diploma or the Science College Entrance Diploma issued by the Department of Education of the State of New York.

### Requirements for Admission of Special Students

Opportunities are provided for persons who desire to pursue special studies. In order to be eligible for admission to special work, applicants must offer two full years of recent farm experience and must also either have fifteen units of entrance credits or be twenty-one years of age. In addition, applicants for admis-

\*If an applicant has counted Biology (1), he may not also offer Botany (½) or Zoology (½).

\*\*An applicant may offer not to exceed four units in vocational subjects under numbers 16, 17, and 19 combined. Bookkeeping may not be offered together with more than one of the subjects listed under 16, 17, and 18.

†French or German is recommended for entrance. For the Graduate School requirement with reference to a reading knowledge of French and German, see page 6 of the Announcement of the Graduate School.

sion on the age requirement must satisfy the faculty of their ability to handle the work; and every applicant must satisfy the faculty of his bona fide desire for special study. He will be required to present an honorable dismissal from the school last attended, certificates of good moral character, and such other certificates and letters as may be desired. The special work is designed to meet the needs of young men and young women from farms who have not time for a four year course, and of mature persons who desire to spend a brief period in specialized study. The work is not a definite "course" in the sense of having a program or a prescribed set of studies. The student chooses any of the agricultural "electives" that he is fitted to pursue. Certain courses are given by some of the departments for students who lack some of the fundamental work usually required in those subjects. Admission as a special student does not admit to classes. The student is admitted to the various classes by the heads of the departments concerned.

### **Requirements for Admission to the Summer Term**

Applicants for admission to the summer term as regular students in the four year college course must, in addition to satisfying entrance requirements in full, have completed all the required work of the first two years of the regular course as outlined on pages 13-14, or the substantial equivalent thereof. Special students are admitted to the summer term on the same basis as to other terms, as recited above.

### **Other Details for Admission**

For other details as to subjects and methods for admission, see the General Circular of Information, which may be obtained on application to the Secretary, Cornell University, Ithaca, New York.

For admission to advanced standing from other colleges and universities all communications should be addressed to the Registrar of the University. See the General Circular of Information.

For admission as a special student, communications should be addressed to the Secretary, College of Agriculture, and attention is called to the paragraphs on pages 29 and 30 of the General Circular of Information.

For admission to graduate work and candidacy for advanced degrees, communications should be addressed to the Dean of the Graduate School.

### **Requirements for the Degree of Bachelor of Science**

The requirements for the degree of Bachelor of Science shall be residence for eight terms, and, in addition to the prescribed work in the Department of Physical Culture and of Military Science and Tactics, the completion of one hundred and twenty hours of required and elective work as outlined on pages 13-14.

All men students must satisfy the farm practice requirement before the beginning of the senior year. Exemption from this requirement is allowed only to students specializing in the Departments of Botany, Home Economics, Forestry, Entomology, or Landscape Art. Application for such exemption must be made at the office of the Secretary. All new students, except women, must report to the Department of Farm Practice as assigned at registration.

A student admitted to the College of Agriculture from another college in Cornell University, or from any other institution of collegiate rank, will be regarded as having completed the number of terms and hours to which his records entitle him, and will receive all the privileges of students who have completed the same number of terms and hours by residence in the College. In order, however, to obtain the degree of Bachelor of Science, he must have completed the prescribed subjects in the four year course and the requisite number of elective hours in agricultural subjects. He must also have been in residence in the College of Agriculture for at least two consecutive terms and have completed not less than fifteen hours a term, of which two-thirds, at least, must be subjects taught by the staff of the College of Agriculture.

A student must register for at least twelve hours each term, and no new student may register for more than eighteen hours. Maximum registration by old students is determined on the basis of record.

Regular students may take at their discretion during their four years not to exceed twenty hours of elective subjects in courses offered in other colleges than Agriculture; but such elective subjects shall not interfere with required or back work. Special students must take at least two-thirds of the entire work of each year from subjects taught by members of the staff of Agriculture.

The Course Leading to the Degree of Bachelor of Science

Freshman year		Number of course	Hours 1st term	Hours 2d term

\*Professional students in forestry who do not offer solid geometry and plane trigonometry for entrance are required to take these subjects in their freshman year.  
\*\*Optional for students taking a major in home economics.  
\*\*\*Required of students taking Chemistry 6 in the freshman year.  
\*\*\*\*May be taken in junior or senior year by special permission.

In addition to the above, the required work in military drill and physical training must be taken.

Political Science 51 may be taken this year.

Junior year	Number of course	Hours 1st term	Hours 2d term
Political Science .....	51....	3....	3

**Elective Subjects and Group Requirements**

The remainder of the work is made up of electives to be taken under the following restrictions:

A student may take at his discretion during his four years not to exceed twenty hours of elective subjects in courses offered in other colleges than Agriculture; but such elective subjects shall not interfere with required or back work. The remainder of his elective work must be offered from subjects taught by members of the staff of Agriculture.

In selecting the subjects in the major group in Agriculture, the student must obtain the advice and approval of a professor or an assistant professor having charge of a subject within the group and preferably within the department in which he expects to specialize, who shall be chosen by the student at the beginning of the sophomore year. Students expecting to specialize in forestry, landscape art, home economics, or rural education must take as their advisers professors or assistant professors in those departments.

All students must have passed before graduation at least fifteen hours of agricultural electives in one of the groups named below, and at least three hours in each of three of the other groups.

- Group A—Farm Crops
  - Pomology
  - Soil Technology
  - Floriculture
  - Vegetable Gardening
- Group B—Animal Husbandry
  - Poultry Husbandry
  - Dairy Industry
  - Entomology
- Group C—Agricultural Chemistry
  - Botany
  - Plant Breeding
  - Plant Pathology
  - Meteorology
- Group D—Rural Economy
  - Rural Education
  - Farm Management
  - Extension
  - Rural Engineering
  - Drawing
- Group E—Forestry
  - Home Economics
  - Landscape Art

## DEPARTMENTS OF INSTRUCTION

### BOTANY

**6a. Taxonomy of the Higher Plants.** Credit four hours. Prerequisite course 1 or its equivalent. Lecture, M, 9. Roberts Hall 292. Laboratory, W, 8-1, 2-5. Agronomy Building, Botanical Laboratory. Remainder of the work by appointment. Professor WIEGAND and Mr. METCALF.

A study of the kinds of seed plants and ferns, their classification into genera families and orders, and field work on the local flora about Ithaca. Emphasis will be placed on wild plants, but the more common cultivated plants will receive some attention. The course is planned to follow course 1 and furnish an introduction to field botany and classification of the higher plants, in preparation for special work in various departments and in teaching. Instruction will be given in the preparation of an herbarium and of keys. Laboratory fee, \$3.50. Deposit to cover apparatus, \$2.

**7. Weeds and Weed Seeds.** Credit two hours. Prerequisite course 1 or its equivalent. Lecture, M, 11. Laboratory, Th, 2-5. Agronomy Building, Botanical Laboratory. Professor WIEGAND and Mr. METCALF.

This course is designed to meet the needs of students of agriculture who wish to obtain a working knowledge of weeds and weed seeds. It will also aid persons intending to teach nature study and agriculture in the schools. Laboratory fee, \$1.50.

**9. Histology.** Credit four hours. Prerequisite course 1 or its equivalent. Lecture, F, 8. Laboratory, T Th, 8-10.30, F, 9-11.30. Agronomy Building, Botanical Laboratory. Assistant Professor EAMES and Mr. MACDANIELS.

This course is designed to give a working acquaintance with the internal morphology of vascular plants and with the terminology of cells, tissues, and organs. Emphasis is placed on practice in interpretation and determination of material. To cover the range of variation in cells and tissues, a large amount of material is studied. Variation in form and structure is considered from the standpoint of phylogenetic development and adaptive modification. The course is of value especially to students of morphology, pathology, and plant physiology. Laboratory fee, \$5.

**18. Research in General Botany, Histology, and Taxonomy.** Credit not less than three hours. Professor WIEGAND and Assistant Professor EAMES.

A course designed for graduates and advanced students. Original investigation by students who are adequately prepared. The laboratory fee depends on the nature of the work.

**19. Seminary in Taxonomy, Morphology, Cytology, and Histology.** Credit one hour. Credit restricted to graduate students in the Department. Hours and place to be arranged. Professor WIEGAND and Assistant Professor EAMES.

Broad problems pertaining to botany will be discussed; literature will be reviewed; reports of research will be given.

**21a. Plant Physiology, Advanced Lecture Course.** Credit four hours. Prerequisite training in botany and chemistry, to be determined in each case by

the instructor. Lectures, M T Th F, 7 a. m. Agronomy Building 192. Professor KNUDSON.

**21b. Plant Physiology, Advanced Laboratory Course.** Credit six hours. Prerequisite, as for course 21a. Laboratory, M T Th F, 10-1. Professor KNUDSON and Mr. KNOWLTON.

Topics include nutrition, osmotic pressure, permeability, absorption, conduction, transpiration, toxicity and photosynthesis, metabolic products, digestion, translocation, respiration, fermentation, growth, stimulation, reproduction, and plant response. Lectures and laboratory work are supplemented by written reports. Laboratory fee, \$10; breakage deposit, \$5.

These two courses are the equivalent of course 21, the credit for which is five hours a term in the first and second terms. These courses are designed primarily for advanced or graduate students, and particularly for those specializing in plant study. Students may take both 21a and 21b in the third term, or either may be taken alone.

**30. Special Chapters in Metabolism.** Credit one hour. Open to graduates or to undergraduates who have had course 21 and organic chemistry. Lecture, F, 9. Agronomy Building 192. Professor KNUDSON.

A study of some of the more important temporary and storage products of plant metabolism.

**31. Seminary in Plant Physiology.** Credit one hour. Limited to graduates taking work in the Department. Conferences, hours to be arranged. Agronomy Building 192. Professor KNUDSON.

Topics will be chosen from current work in plant physiology.

**33. Research, Plant Physiology.** Credit for major or minor, otherwise not less than four hours. Prerequisite training in botany, chemistry, and physiology. Agronomy Building 101. Professor KNUDSON.

Problems in plant physiology and in the general relation of plant physiology to agriculture will be assigned for investigation. Reports or a thesis will be required. The amount of the laboratory fee is governed by the nature of the work.

## DRAWING

**2b. Free-hand Drawing and Outdoor Sketching.** Credit two to five hours. Lectures during practice. Practice by appointment. M W F S, 8-12, T Th, 2-5. Dairy Building 371. Professor BAKER.

While this course is designed more particularly to meet the needs of the students of landscape art, being out-of-door study of foliage, tree-growth, and architecture, provision is also made for the needs of the general student of free-hand drawing and of teachers of the subject in the secondary schools.

## ENTOMOLOGY, LIMNOLOGY, AND NATURE STUDY

**2. The Ecology of Insects.** Credit three hours. Lecture, W, 8. Roberts Hall 392. Practical exercises (largely field work), W, 10-12.30, and another period of two hours and a half by appointment. Professor NEEDHAM and Mr. DUSHAM.

A general course in the study of the lives of insects in relation to their environment. Practical studies will be made of the activities of insects and of the rôle that they play in different natural associations. Observations will be made on the relations between their structures and instincts and the situations in which they live, and on many of the ways in which they find a living and establish homes. Laboratory fee, \$2.50.

3. **General Entomology.** Credit three hours. Prerequisite course 1 or Zoology 1. Lectures, M W, 9. Practical exercises, W Th, 2-4.30. Roberts Hall 392. Assistant Professor MATHESON and Mr. FROST.

Lectures on the characteristics of orders, suborders, and the more important families, and on the habits of representative species. The practical exercises include a study of the structure of insects and practice in their classification. The lectures only (credit two hours) are taken by those who have had courses 4 and 5. When possible the laboratory work will utilize materials collected by the student in the field. Laboratory fee, \$1.50.

4. **Elementary Morphology of Insects.** Credit three hours. By appointment. Roberts Hall 391. Professor W. A. RILEY and Mr. YOUNG.

An introductory laboratory course. See note under course 5. Laboratory fee, \$2.

5. **Elementary Systematic Entomology.** Credit two hours. Prerequisite course 4. Hours by appointment. Roberts Hall 391. Professor W. A. RILEY and Mr. YOUNG.

Laboratory fee, \$2.

Courses 4 and 5 are introductory laboratory courses, required of all students who plan to take advanced work in entomology. The work is individual, and both courses may be taken in one term.

10. **Entomotaxy.** Credit two or three hours. Prerequisite course 4, should be accompanied by course 5. Laboratory and field work, W F, 2-5, and for three-hour students, Th or F, 10-1. Roberts Hall 301. Assistant Professor VAN DYKE.

Methods of collecting insects and of preserving them for study and the cabinet, together with other matters of technique. Practice in the identification of the insects of the local fauna. Two all-day field trips will be required.

12. **Taxonomy of Insects.** Credit four hours. Prerequisite courses 3, 4, 5, 11, 14, and 20, and preferably 10. Lecture, F, 8. Laboratory, F, 10-1, and two other periods of three hours each to be arranged. Assistant Professor BRADLEY, Professors NEEDHAM and JOHANSEN, Assistant Professors MATHESON and VAN DYKE, and cooperating specialists.

This course will continue throughout a number of terms, but the work of each term may be elected independently. The course is intended primarily for graduate students who desire a systematic survey of one or more of the orders of insects. Laboratory fee, \$4.50.

1. **Coleoptera.** Assistant Professor VAN DYKE.

19. **Research in Systematic Entomology.** Credit three or more hours. Prerequisite courses 3, 10, 11, 14, 20, and one term of course 12. Laboratory hours by arrangement. Roberts Hall 301. Assistant Professor VAN DYKE, Professors NEEDHAM and JOHANSEN.

**29. Research in Morphology of Insects.** Credit three or more hours. Prerequisite courses 3, 4, and 5. Laboratory open daily except S, 8-5; S, 8-1. Roberts Hall 391. Professors W. A. RILEY and NEEDHAM.

Special work arranged with reference to the needs and attainments of each student. Laboratory fee, \$1.50 a credit hour.

**40. Advanced Economic Entomology and Insectary Methods.** Credit three hours. Open only to graduates. Seminary, T, 2-4.30. Field and laboratory work by appointment. Insectary. Assistant Professor MATHESON.

Economic problems connected with applied entomology will be discussed and reported on, and field observations will be made. Experimental methods in breeding, photographing, investigating, and controlling insects will be discussed and studied. Designed for advanced students in entomology who desire to fit themselves for experiment station work. Laboratory fee, \$2.50.

**49. Research in Economic Entomology.** Credit three or more hours. Prerequisite courses 3, 4, 5, 11, and 14. Laboratory and field work by appointment. Insectary. Professor HERRICK and Assistant Professor MATHESON.

In most cases it is impracticable to complete an investigation in this subject during the college year. Students must arrange to conduct their observations during the growing season.

**50. General Limnology.** Credit three hours. Open only to students who have taken or are taking course 3 and Biology 1, or the equivalent. Lecture, Th, 8. Roberts Hall 392. Laboratory, Th, 2-4.30, and another period of two hours and a half by appointment. Roberts Hall 492. Professor NEEDHAM and Mr. KENNEDY.

An introduction to the study of the life of inland waters. Aquatic organisms in their qualitative, quantitative, seasonal, and ecological relations. Laboratory fee, \$2.50.

**59. Research in Limnology.** Credit three or more hours. Prerequisite course 50 or its equivalent. Laboratory and field work by appointment. Roberts Hall 492 and Biological Field Station. Professors NEEDHAM and W. A. RILEY, and Assistant Professor EMBODY.

**Seminary.** M, 4.30-5.30. Roberts Hall 392.

The work of an entomological seminary is conducted by the Jugatae, an entomological club which meets for the discussion of the results of investigations.

## FARM CROPS

**2. Farm Crops, Advanced Course.** Credit three hours. Prerequisite course 1. Lectures, M T W, 8. Agronomy Building 192. Professor MONTGOMERY.

The object of this course is to study the more important principles of crop production, based on experimental evidence. Both cereal and forage crops are studied. An effort is made to acquaint the student with the best sources of literature, especially the work of experiment stations. About six hours of reference reading is required each week.

**5. Seminary.** Without credit. Required of graduate students. M, 4. Agronomy Building 192. Professor MONTGOMERY.

**6. Research.** Credit two or more hours. Prerequisite permission to register. Limited to graduate students. Professor MONTGOMERY.

### FARM MANAGEMENT

[2. **Farm Management.** Credit four hours. Open to students who have passed the farm practice examination. Lectures, M W F, 10. Dairy Building 222. Laboratory, T, 2-4.30. Farm Management Building 102. On days when farms are visited, laboratory work may last longer than two and one-half hours. Assistant Professor THOMPSON.] Not given in 1917-18.

This course is designed for students who have had considerable farm experience. It should be taken near the end of the student's college course.

Lectures, recitations, and laboratory practice. Farming as a business; labor income; size, diversity, and production of business; regions and types of farming; cropping systems; farm layout; building arrangement; efficient use of labor, horses, and machinery; marketing; forms of tenures and leases; organization and management of successful farms; ways of starting farming; use of capital and credit; choosing and buying a farm; planning, organization, and management of specific farms. A one-day excursion to farms at some distance from Ithaca will be made about September 5. Laboratory fee, \$2.

### FARM PRACTICE

1. **Farm Practice.** Without credit. Hour and place by appointment. Professor KING and Mr. ———.

An elective course designed to assist students in meeting the requirements in farm practice demanded by the College. In order to meet these requirements, students must have a practical knowledge of horses, cattle, sheep, swine, poultry, crops, farm machinery, orcharding, gardening, butter and cheese making, and the like. All men students except those whose record and registration at the beginning of the senior year show that they are specializing to the extent of fifteen hours in home economics, forestry, landscape art, or entomology, must fully satisfy, before the beginning of the senior year, the requirements in farm practice. The Department of Forestry requires three months of forestry practice in lieu of the farm practice requirement. All men students are required to report to the Department of Farm Practice as assigned within the first three weeks of their first term in the College.

### FLORICULTURE

3. **Commercial Floriculture.** Credit four hours. Prerequisite course 1 or commercial experience, and course 2. Lectures and recitations, M W F, 9. Practice, W, 2-4.30. Greenhouses. Assistant Professor LUMSDEN and Mr. VOLZ.

Studies in the propagation and culture of florists' crops. As far as possible practical work will be given in the propagation and culture of roses, carnations, violets, orchids, and other plants grown for commercial purposes. Methods of packing, shipping, and marketing will be considered. Laboratory fee, \$2.

8. **Garden Flowers.** Credit three hours. Lectures, T Th, 9. Practice, T or Th, 2-4.30. Greenhouses and gardens. Assistant Professor LUMSDEN and Mr. VOLZ.

A study is made of the identification, propagation, and culture of annuals, herbaceous perennials, and roses in order to give the student an intimate knowledge of the forms that may be used in garden planting either on home grounds or in public parks. An excellent collection of plant material is available for

demonstration work in this course. All members of this class will be required to participate in an excursion to the Thompson estate at Canandaigua on August 15. Laboratory fee, \$2.

**8a. Grouping and Arrangement of Annuals and Herbaceous Perennials.** Credit two hours. Prerequisite course 8 and Botany 1. Lecture, S, 9. Practice, S, 10.30-1. Greenhouses. Assistant Professor LUMSDEN.

A study of the principles and methods of arrangement of garden flowers in the border and flower garden. The planting of borders for a continuous display of bloom throughout the season. Æsthetic taste in color arrangement will also be studied. Laboratory fee, \$2.

**9. Amateur Floriculture.** Credit three hours. Lectures, W F, 9. Practice, M, 2-4.30. Greenhouses. Mr. THAYER.

The propagation and culture of potted plants in the home—plants suitable for window gardening and for outdoor home gardening. The course includes a study of containers, soils, fertilizers, and insecticides; also the preparation and planting of flower beds. It is planned primarily for students who are interested especially in home economics, but is open to any one desiring information regarding simple methods of plant culture. Laboratory fee, \$2.

**12. Investigation in Floriculture.** Credit one, two, or three hours. Prerequisite courses 1, 3, and 4, and permission to register. Designed primarily for upperclassmen and graduate students. Consultation by appointment. Professor BEAL and Assistant Professor LUMSDEN.

The investigation of problems in growing flowers for cutting, exotics, garden flowers, and the like.

## FORESTRY

The first six weeks of the summer term will be spent at Ithaca; the remainder of the term will be spent in camp on a forest tract, in St. Lawrence County in the summer of 1917.

The following courses of instruction will be offered:

### Group A

Forestry 9  
Forestry 11  
Forestry 14  
Forestry 15

Forest Utilization  
Forest Mensuration  
Silviculture: Forest Ecology  
Silviculture: Natural Reproduction and Care of the Forest

### Group B

Forestry 20  
  
Forestry 22  
Forestry 23  
Forestry 24

Forest Management: (a) Forest Organization  
Seminary  
Advanced Work  
Research

For the professional forestry students, the courses in Group A will constitute the first term's work of the senior year. During the following term, these students are expected to obtain the required practical experience, returning to Ithaca to complete undergraduate work in the second term. Courses in Group B are offered for graduate students.

Courses 9, 11, 14, 15, and 20 will hereafter be given for professional forestry students during the third, or summer, term only, because of the obvious advantages of the season and place of work.

The camp fee is \$55; railroad fares are about \$15. Tents and beds are provided, but students must furnish their own bedding and field clothing.

In the following program, the designated hours and rooms apply to work in Ithaca. A special camp schedule is to be arranged.

**9. Forest Utilization.** Credit four hours. Lectures, M T W Th F, 11. Forestry Building 122. Practice in forestry camp latter part of term. Professor RECKNAGEL.

The principal industrial uses of timber; logging methods and equipment; logging in representative regions; manufacture of lumber; determination of stumpage values; timber sale contracts; timber sale administration, including marking, brush disposal, and scaling in practice; minor industries; utilization of forest products other than wood, as grazing range, fish and game, and the like.

**11. Forest Mensuration.** Credit five hours. Lectures, M T W, 8. Forestry Building 126. Practice, M, 2-4.30. Forestry Building 118, and in camp. Assistant Professor BENTLEY.

Measurement of logs and standing timber; timber cruising; study of the rate of growth of timber; volume and yield tables. Laboratory fee, \$1.50.

**14. Silviculture: Forest Ecology.** First six weeks of term. Credit three hours. Open only to professional forestry students. Prerequisite course 13 and Botany 2 or its equivalent. Lectures, M T W Th F, 10. Forestry Building 122. Practice, W, 2-4.30, S, 8-1. Forestry Building 8. Professor SPRING.

The study of the forest as a society of trees; biological characteristics of trees and of stands in relation to the factors of site; influence of the forest on site; forest description. Laboratory fee, 50 cents.

**15. Silviculture: Natural Reproduction and Care of the Forest.** Latter part of term. Credit three hours. Prerequisite courses 13 and 14. Lectures and practice to be arranged. Professor SPRING.

A technical discussion of the silvicultural methods of reproducing forests by natural seeding; the application of these in each of the forest regions of the United States and Canada; cleanings, improvement cuttings, and thinnings; marking timber for cutting. Laboratory fee, 50 cents.

**20. Forest Management: (a) Forest Organization.** Credit three hours. Open only to graduate students. Lectures, M W F, 9. Forestry Building 126. Practice in forestry camp. Professor RECKNAGEL.

The organizing of a forest property for management. An important part of this course is the preparation of a working plan on a large forest tract in New York State; the course includes practice in forest engineering under direction of Assistant Professor BENTLEY, and field studies in forest administration.

**22. Seminary.** Credit two hours. Open only to graduate students. Hours to be arranged. Forestry Building 126. Professors HOSMER, SPRING, and RECKNAGEL, and Assistant Professors BENTLEY and COLLINGWOOD.

Field conferences on important phases of forestry.

**23. Advanced Work.** Credit two or more hours. Open to undergraduate and graduate students who have had the necessary training. Hours by appoint-

ment. Professors HOSMER, SPRING, and RECKNAGEL, and Assistant Professors BENTLEY and COLLINGWOOD.

Individual advanced study of designated topics.

24. **Research.** Credit three or more hours. Open only to graduate students who have had the necessary training. Hours by appointment. Professors HOSMER, SPRING, and RECKNAGEL, and Assistant Professors BENTLEY and COLLINGWOOD.

### LANDSCAPE ART

13. **Plant Materials.** Credit six hours. Open to general election, but intended for regular students in landscape art. Prerequisite Botany 1. Lectures, M W, 8. Practice and field trips, M F, 10-12.30 and 2-4.30. Landscape Art Building. Professor CURTIS.

A study of the characteristics and requirements of trees, shrubs, and vines for landscape planting, and a discussion of them as elements in landscape composition.

The work has been planned in consultation with the Departments of Drawing and Floriculture, so that a total registration of 16 hours may be made as follows: drawing, 5 hours; floriculture, 5 hours; and landscape art, 6 hours. All of this instruction enters into the regular landscape art schedule and carries full term credit towards graduation. Laboratory fee, \$1.50.

### PLANT BREEDING

6. **Plant Breeding, General Course.** Credit four hours. Prerequisite Botany 1 and 20. Lectures, W F, 9. Recitation, M, 9. Forestry Building 210. Laboratory, M, 2-4.30. Forestry Building 212. Assistant Professor BARKER and Mr. FRASER.

A general introductory course treating of variation, the laws of heredity, and selection. Equivalent to courses 1 and 2. Laboratory fee, \$3.

13. **Genetics, Advanced Course.** Credit three hours. Primarily for graduate students; seniors admitted by special arrangement only. Prerequisite courses 1 and 2, or 6 and 8, and Botany 1, 10, and 20. Lectures, T Th, 9. Forestry Building 210. Laboratory, W, 2-4.30. Forestry Building 212. Professor HUTCHISON and Mr. FRASER.

Lectures on special topics in genetics. The present status and the more important problems in Mendelism, linkage, sex inheritance, the pure-line question, selection, the mutation theory, and the like. Laboratory studies of Mendelian ratios, linkage, sex inheritance, and the like. Laboratory fee, \$3.

### PLANT PATHOLOGY

1. **Plant Pathology.** Credit one, three, or four hours. Prerequisite Botany 1 and 20 or equivalents. Lecture, credit one hour, Th, 10. Roberts Hall 292. Must accompany or follow recitations and practice. Recitation and laboratory practice, credit three hours. Recitation, F, 12. Agronomy Building 192. Laboratory practice, W F, 2-4.30. Bailey Hall, West Basement. Professor WHETZEL, Assistant Professors GREGORY and HESLER, and Mr. HOPKINS.

A fundamental course treating of the nature, cause, and control of plant diseases, illustrated by studies of the commoner diseases of cultivated crops. Laboratory fee, \$4.50; breakage deposit, \$3.

2. **Principles of Plant Disease Control.** Credit three hours. Prerequisite course 1. Recitation, Th, 12. Home Economics Building 100. Laboratory practice, Th, 2-4.30, S, 10.30-1. Bailey Hall, West Basement. Professor WHETZEL, Assistant Professors GREGORY and HESLER, and Mr. HOPKINS.

A consideration of the principles and the methods of control of plant diseases. This will include studies on: exclusion by laws, regulations, quarantine, and inspection; eradication by pruning, seed selection, tree surgery, rotation, disinfection, and other means; protection by spraying, dusting, wound dressing, and the like; immunization by selection, breeding, and feeding. Laboratory fee, \$4.50; breakage deposit, \$3.

6. **Elementary Mycology.** Credit three hours. Prerequisite Botany 1 or equivalent and permission to register. Lecture, T, 11. Laboratory practice, M T, 2-4.30. Bailey Hall, East Basement. Assistant Professor HESLER and Mr. HOPKINS.

Comparative studies of the morphology, life history, and classification of the fungi. A general introductory course in mycology for undergraduates. Laboratory fee, \$4.50; breakage deposit, \$3.

20. **Research.** Credit not less than three hours. Professors WHETZEL and REDDICK, and Assistant Professors STEWART, GREGORY, and HESLER. Laboratory fee, \$1.50 a credit hour; breakage deposit, \$3.

24. **German Phytopathological Reading.** Without credit. Open only to graduate and advanced students. Two hours each week. Hours to be arranged. Home Economics 100. Professor WHETZEL.

## POMOLOGY

10. **Systematic Pomology.** Credit two hours. Prerequisite courses 1 and 8 and Botany 1. Lectures or recitations, T Th, 8. Roberts Hall 292. Several laboratory periods, S, 8-10.30, will be substituted for a corresponding number of lectures. Messrs. HEINICKE and CARRICK.

A study of the botanical and physiological characteristics of all species of fruit-bearing plants, with special reference to their cultural requirements. The characteristic cultural methods of each fruit not discussed in a previous course are considered. Each student is required to collect and mount specimens of a number of varieties and species. Laboratory fee, \$1.

13. **Pomology, Advanced Laboratory Course.** Credit one hour. Prerequisite courses 1, 8, 10, and 12, and permission to register. Hours and place to be arranged. Messrs. HEINICKE, CARRICK, and DEMOTT.

This course is designed to give more extended practice in the various nursery and orchard operations than can be given in course 1. It is intended for students doing their major work in pomology. Laboratory fee, \$2.50.

19. **Research.** Credit one to three hours. Open to graduate or other students who have had courses 10, 12, and 13, Botany 1 and 20, Plant Pathology 1, Entomology 3, and Chemistry 1 and 30 or 32. Professor CHANDLER and Mr. HEINICKE.

**POULTRY HUSBANDRY**

**1. Poultry Husbandry.** Credit three hours. Not offered to a class of less than ten students. Lectures, T Th, 11. Poultry Building 375. Practice, T, 2-4.30. Poultry Building 325. Messrs. KENT and ———.

An introductory and prerequisite course for students desiring to take specialized courses in poultry husbandry. Those desiring a general course should see courses 2a, 3, 3a, and 10. The course includes the anatomy and physiology of poultry, the study of the egg, embryology, nomenclature, bibliography, environmental conditions, the history and scope of poultry husbandry.

**2a. Flock and Plant Management.** Credit one hour. Must be preceded or accompanied by course 2 or 10 and preferably also by Animal Husbandry 1. Practice periods and extra time arranged by appointment. Practice, three short periods a day, including Sunday, for four weeks: morning, 7.45-8.30; noon, 12.45-1.15; night, 4.30-5. Poultry Building. Messrs. KENT and ANDREWS.

Record keeping, and management of fowls for egg production and for fattening, including preparation for market. Assigned reading and a written examination will be required.

**3. Incubator Practice.** Credit one hour. Must be preceded or accompanied by course 1a or 10. Practice periods and extra time arranged by appointment. Practice, three short periods a day, including Sunday, for four weeks: morning, 7.45-8.30; noon, 12.45-1.15; night, 4.30-5. Poultry Building. Messrs. KENT and BUCHAN.

Practice in operating incubators; testing eggs, keeping records, and taking apart and setting up machines. Assigned reading and a written examination will be required.

**3a. Brooder Practice.** Credit one hour. Must be preceded or accompanied by course 1a or 10. Practice period and extra time arranged by appointment. Practice, three short periods a day, including Sunday, for four weeks: morning, 7.45-8.30; noon, 12.45-1.15; night, 4.30-5. Poultry Building. Messrs. KENT and BUCHAN.

The management of a brooder and a flock of chickens; the keeping of temperature, food, and growth records. Assigned reading and a written examination will be required.

**7a. Marketing Practice.** Credit one hour. Prerequisite course 7 and permission to register. Discussion hour, T, 4.45-5.45. Poultry Building 325. Practice periods arranged by appointment. Poultry Building 100. Messrs. KENT and ———.

This course is to accompany or supplement course 7 for those who desire additional instruction in the handling of poultry products and refrigeration machinery, and in general salesroom work.

**10. Farm Poultry.** Credit three hours. Not open to students who have taken any other course in poultry husbandry, except by special permission. Lectures, M W, 11. Poultry Building 375. Laboratory, T W, 2-4.30. Poultry Building 300. Messrs. KENT and ———.

A brief course dealing with the practical application of the principles of poultry husbandry for persons who do not specialize in this subject.

**11. Undergraduate Conference.** Credit one hour. Prerequisite course 8 and permission to register. M, 4.45-5.45. Poultry Building 325. Members of the departmental staff.

Round-table discussion of poultry literature and current problems of interest to the advanced student of poultry husbandry, including critical examinations of experiment station literature and research methods relating to poultry. Written reports will be required on many of the subjects discussed.

**11a. Seminary.** For graduate students only; required of all graduate students in poultry husbandry. W, 4.45-5.45. Poultry Building 325. Members of the departmental staff.

**12. Research.** Credit one to three hours. Must be preceded or accompanied by courses 8 and 11. Time arranged by appointment. Poultry Building. Members of the departmental staff.

An original investigation of a problem in poultry husbandry to be presented as a written thesis.

### RURAL ENGINEERING

**[3. Farm Mechanics.** Credit three hours. Students are urged but not required to take Drawing 1 or its equivalent in preparation for this course. Lectures, M W, 12. Caldwell Hall 100. Practice, M or T, 2-4.30. Rural Engineering Building. Professor H. W. RILEY.] Not given in 1917-18.

A study of the principles of operation, the details of construction, and the practical operation and care of machinery, including gasoline engines, devices for transmitting power, hydraulic rams, pumps, spray nozzles, spraying outfits, water-supply outfits; implements, including mowers and binder attachment, with a discussion of the special mechanical features of some of these implements now on the market. Laboratory fee, \$2.

**[19. Research in Farm Mechanics.** Credit one or more hours. Prerequisite course 3 or its equivalent, and permission to register, together with natural ability in mechanical practice. Professor H. W. RILEY.] Not given in 1917-18.

Special work in farm mechanics on problems under investigation by the Department or of special interest to the student, provided, in the latter case, that the Department can furnish adequate facilities.

**[20. Farm Engineering.** Credit three hours. Prerequisite plane geometry; students are urged to take Drawing 1 in preparation for this course. Lectures, T Th, 10. Caldwell Hall 143. Practice, W, 2-4.30. Caldwell Hall 400. Mr. STRAHAN.

A study of the practical solution of the elementary problems involved in connection with surveying and mapping the farm; locating, digging, and laying drains; laying out building foundations and farm water-supply and sewage disposal systems. From the data obtained in the field a contour map will be drawn for one of the fields near the College. Attention will also be given to concrete construction, the design of simple structures, and estimates of their cost. Laboratory fee, \$2.

**28. Farm Engineering, Advanced Course.** Credit two or more hours. Prerequisite course 20 or its equivalent, and permission to register. Lecture, T, 8. Caldwell Hall 250. Practice, one problem as assigned. Mr. STRAHAN.

**30. Farm Structures.** Credit two hours. Prerequisite Drawing 1. Drafting periods, any two, M W, 8-10.30; T Th, 2-4.30. Caldwell Hall 400. Mr. STRAHAN.

A study of building materials used on the farm; the principles of construction for barns, stables, and other farm buildings, and their application in practice.

### SOIL TECHNOLOGY

**1. Principles of Soil Management.** Credit three hours. Prerequisite Chemistry 1 and Geology 1. Lectures, T Th, 9. Caldwell Hall 143. Laboratory, two and one-half hour period to be arranged. Caldwell Hall 49. Recitation, M, W, or F, 8. Caldwell Hall 143. Students must consult the Department in regard to laboratory and recitation appointments before registering for the course. Assistant Professor BUCKMAN.

A comprehensive course dealing with the origin, composition, and properties of soils, with particular reference to their management in crop production. The laboratory work consists of practice designed to demonstrate fundamental physical relations. Laboratory deposit, \$3.

**11. Research.** For graduate students only. Hours by appointment. Caldwell Hall. Professor BIZZELL and other members of the departmental staff.

### VEGETABLE GARDENING

**2. Commercial Vegetable Gardening.** Credit four hours. Prerequisite course 1 and Botany 1; must be preceded or accompanied by Soils 1. Lectures, T Th, 8. Poultry Building 375. Practice, M, 2-4.30. Poultry Building 350, vegetable greenhouses, and gardens. Messrs. KIRKPATRICK and KENERSON.

The principles of vegetable growing as applied in commercial production: choice of location, equipment, management, culture, special requirements, varieties, enemies, marketing, and profits. The laboratory work includes exercises in growing plants and in the planting and care of outdoor vegetables. Each student assumes full charge of his own plantings, carrying them through to the end of the term. A one-day trip to visit market gardens is required during the term. Cost about \$5. Laboratory fee, \$2.

**3. Commercial Vegetable Gardening.** Credit four hours. Open only to students who have had the work of the second term. Lectures, T Th, 8. Practice, T Th, 10-1. Poultry Building 325, vegetable greenhouses, and gardens. Messrs. WORK and KENERSON.

The time of this course corresponds with the growing season for the crops, and the student is in touch with plantings of the leading vegetables in the departmental gardens. This affords excellent practice in the care, harvesting, and marketing of the products. Each student is assigned a small garden plot which he cares for throughout the term. Several short excursions are made to near-by market gardens. There will be a one-, two-, or three-days trip to some of the most important vegetable-growing centers in the State, the cost of which will be \$10 to \$15. Laboratory fee, \$2.

**5. Systematic Vegetable Crops.** Credit three hours. Prerequisite course 3, or in special cases course 2, and permission to register. Lecture, T, 9. Poultry

Building 325. Laboratory, T Th, 2-4.30. Vegetable gardens at East Ithaca. Messrs. WORK and KENERSON.

Lectures and descriptive studies dealing with vegetable crops, their origin and botany. Varieties of the different vegetables, their characteristics and their adaptation to different cultural and market conditions. Judging and preparing exhibits. The important commercial types of different vegetables are grown in the garden each year, and there is an abundance of first-hand material for the course. A judging trip to the State Fair at Syracuse is required and costs about \$6. Each student makes a special systematic study of a crop or a group of crops, and presents a typewritten and bound report. Laboratory fee, \$2.

6. **Practice.** Without credit. Prerequisite permission to register. One or two hours by appointment. Messrs. WORK and HARGREAVES.

Opportunity will be offered for a few students who are specializing in vegetable gardening to obtain practice in greenhouses and gardens.

7. **Vegetable Gardening, Advanced Course.** Credit two or more hours, by arrangement. Prerequisite course 3 and permission to register. Poultry Building 232. Mr. WORK and assistants.

A special problem to be arranged; occasional short excursions. A typewritten and bound report of the special problem is required. Laboratory fee according to the nature of the problem.

8. **Inspection Trip.** Credit one hour. Prerequisite course 2 or 3 and permission to register. May not be elected unless satisfactory arrangements can be made with departments giving conflicting courses. Not given unless four students register. Mr. WORK.

A trip occupying a week, to important vegetable-growing centers in the East. A wide variety of types of vegetable gardening will be observed on this trip, and markets will be visited. The cost will be about \$50. A typewritten report is required.

9. **Canning Vegetable Crops.** Credit two hours. (An additional credit hour of laboratory work may be elected by arrangement.) Prerequisite course 2 or 3. Lecture, T, 10. Poultry Building 350. Laboratory, ten forenoons by arrangement on W, F, or S, 8-1. East Ithaca gardens. Mr. KIRKPATRICK.

Canning as a means of utilizing surplus products of vegetable farms; lectures and laboratory work dealing with the principles and practices of preparing, packing, processing, and marketing preserved vegetable products. The Department operates a farm canning outfit with a daily capacity of 1000-1500 tins. A two-days trip will be arranged to some of the most important canning centers or to vegetable farms operating farm canning outfits. Exact date to be arranged; cost about \$10-12. Laboratory fee, \$3.50.

Correspondence concerning the publications of Cornell University should be addressed to H. A. Hitchcock, Secretary of Cornell University, Ithaca, New York.

This publication is issued at Ithaca, New York, monthly from July to November inclusive, and semi-monthly from December to June inclusive.

[Entered as second-class matter, December 14, 1916, at the post office at Ithaca, New York, under the act of August 24, 1912.]

The Annual Register (for the year 1916-17, published January 1, 1917), price 50 cents.

Book of Views, price 25 cents.

Directory of Faculty and Students, Second Term, 1916-17, price 10 cents, and the following informational publications, any one of which will be sent gratis and post-free on request. The date of the last edition of each is given after the title.

General Circular of Information for Prospective Students, December 15, 1916.
